

Press Freedom Violations (April - June 2018)

Freedom Forum has been continuously monitoring press freedom violations, making records and using it for advocacy. Every three months, the data of violations are shown in graphs, so that it would be easier to know the facts. Now onwards, the data on the violations would be segregated to various headings, therefore creating database for different purposes. Data categorization and visualization as violation type, elements hostile to media, content wise threat, province wise threat, threats by gender would not only ease the understanding quickly but also help anyone to link the press freedom violations to their respective advocacy.

Total No of Cases: 21 Total No of Affected: 83
