GENDER JUSTICE MONITORING

April-June 2018

This is the second three-monthly report (April to June 2018) of the monitoring of news contents and opinion articles observing female representation in the online news portals and major nine national dailies. The data generated after procedural observation have been categorized into various headings, thereby giving clear visualization of the study report. One among the finding is- the report, in contrary to the previous one, mentions more women as new sources in the news related to politics.
